Veritas Alarm Master training course

Zero to hero in 2 days

A two-day fast track course for beginners / installers with basic install knowledge, to go from zero to master Veritas alarm installer in 2 days.
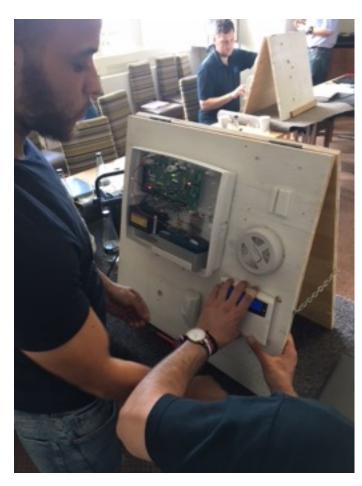

At the end of the 2 days you should:
   - Understand the optimal design and installation procedure using the Texecom Veritas alarm panel
   - Be able to install quickly & with minimal faults, including programming & field craft tips
   - Understand common installer faults & be capable at basic fault-finding

Hands-on training format & certification

Training includes a mix of classroom tuition mixed with hand-on installation and programming training, using live Veritas panels - solo and team work - followed by a "Veritas Alarm Master" certification test at the end of the two days.

Maximum attendees of 4 per class.

"I was very impressed by the Veritas Master training course; it's a nicely structured course, and Nathan has a reassuring knowledgeable training style."

Chris, Alarm Installer (Wigan)

Key areas of learning

Texecom

Key areas the Veritas Master course covers include:
- **Panel introduction**: functionality overview, features & faults
- **Sensors introduction**: what sensors to use where, features & faults
- **How to design & set-up a system**: typical system design & standardised installation procedure (what to install when / where) for maximising installation speed & error minimisation
- **Programming**: understand full Veritas programming features; learn standardised programming procedure & system set-up
- **Installation tips & tricks**: tips on how best to wire up a panel, sensor wiring (inc advice around end-of-line, tamper circuits etc.)
- **Common FAQs & faulting finding**: learn some common installer errors, learn how to fix basic faults

Depending on the progress of the class, we can also include *advanced extras* including:
- **Alarm Monitoring**: wiring & programming different diallers, including LiveTalk audio-verification
